

**EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503**

September 30, 2026
(Senate)

STATEMENT OF ADMINISTRATION POLICY

H.R. 9340 – Ratepayer Protection Act
(Rep. Evans, R-CO, and 42 cosponsors)

The Administration strongly supports passage of H.R. 9340, the Ratepayer Protection Act. The bill would help ensure that American families and small businesses are not bearing the infrastructure costs created by large data centers.

H.R. 9340 would establish Federal standards for state regulators to use when reviewing proposals for new large-load electricity customers with an electricity demand of 100 megawatts or more. The standards would require large-load electricity customers to pay for the full incremental costs to serve their loads. The bill would preserve state flexibility by requiring regulators to consider the large-load standards while retaining the authority to regulate electricity markets.

As America races to lead the world in Super Intelligence, we must build the energy infrastructure needed to support this innovation. The Administration strongly supports H.R. 9340 as it would protect Americans and ensure our nation can continue to win the Super Intelligence race.

If H.R. 9340 were presented to the President, his advisors would recommend that he sign it into law.
